

RITMO AMERICA

"AT EASE IN YOUR JOBSITE"

www.ritmoamerica.com

RITMO S.P.A. is a world leader with over 35 years of experience in the manufacturing of plastic welding equipment. All products are designed and built according to International standards and directives (UNI, ISO, CEE). Since the very beginning, quality and technology innovation are RITMO's milestones, and time after time, this philosophy is always more recognized by the global market. RITMO strong points are its ideas to design and produce accurate, fast, versatile, modular and easy-to-use welding machines. Products range includes butt fusion, electrofusion and extrusion equipment. Ritmo is also providing a complete line of accessories and useful instruments for pipe cutting and weld preparation such as the band saws. RITMO's regards towards the client has brought to the new-born "RITMO FUSION OPERATOR SCHOOL", which is a welding school with the goal of building qualified personnel and spread the knowledge about the technical potentiality of RITMO's equipment: **TECHNOLOGY MADE IN ITALY.**

RITMO SERVICE

RITMO WORLDWIDE

Ritmo has professional distributors and resellers all over the world. Our staff is ready to assist you in English, Spanish, French, German, Arab, Italian, Russian and Portuguese.

TRAINING

From many years now, we have decided that the best way to grant a client/distributor a perfect knowledge of our products is to invest in custom training, in our own premises. These courses are aimed to teach how to operate the products in the best way, and how to supply the "first aid" when necessary.

PRESALES TECHNICAL ASSISTANCE

When a client or a potential client wants to buy us a product, it is our standard procedure to help find the best solution to its needs.

GLOBAL ADVICE

In such a technical field as ours, the customer requires the best assistance. Thanks to the experience developed along the years, and to the co-operation with several manufacturers, institutions, schools and training institutes, RITMO is able to give the most comprehensive advice to no matter which related issue.

Our company is a long-time member of a UNIPLAST's (UNI-Italian National Plastics Standards Body) working group dedicated to the study and draw up of new standards within our field. The importance of this group is linked to the fact that the expansion of the plastic welding field ought to be followed by a crescent sensitivity for safety issues, so to have a sustainable and continuous growth. The working group prepares draws, hence present them to the UNI to be discussed and eventually transformed into new standards.

AFTER SALES TECHNICAL ASSISTANCE

Ritmo's Service Centre can solve all kind of technical issues, as well as overhaul our machines. Ritmo has other Service Centres abroad, linked to its official distributors.

STARTING AND TESTING

RITMO' technicians are prepared to make the starting and testing of workshop machines at the client' own premises, so that the fittings production can start almost immediately.

DELTA 630

This is a self-aligning machine, suitable for fusion ducts for the transport of water, gas and other fluids under pressure, up to Ø 630 mm. The **DELTA 630** was designed in accordance to the International correspondent standards (UNI 10565, ISO 12176-1), and consists of:

- **A machine body** with a steel bearing frame, four steel clamps and two hydraulic thrust cylinders with non-drip quick couplings and steel inserts.
- **Self detaching device:** helps removing the heating plate during fusion procedure.
- **An extractable heating plate** with separate thermometer for reading the working temperature.
- **An extractable electric facer** for leveling the ends of the pipe and/or fitting, with a safety microswitch and overload cutout. Facer's plastic control box is protected by a metal frame, and equipped with a fast removing system to speed up the extraction from machine body.
- **An electrohydraulic gearcase** with a clamps opening and closing lever, maximum pressure and release valves (also useful when welding with the "Dual Pressure" procedure), hydraulic hoses with non-drip quick couplings, a timer (for the heating and fusion phases).
- **Digital electric connections** box with the high precision ($\pm 1^\circ\text{C}$) "Digital Dragon" temperature controller protected by a special container and equipped with a reading display and keys for temperature adjustment.
- **A facer/heating plate support.**

With **DELTA 630** it is possible to fusion fittings such as elbows, tees, wyes and stub ends. This is possible because the 3rd clamp can be anchored to the 1st and 2nd (movable) and slide along with the pipe. The fitting have to be locked in the 4th clamp. Short neck stub ends can be fused with the help of a special tool (on request).

STANDARD COMPOSITION

- Machine body with a tool kit
- TP DELTA 630 TE plate
- Facer
- Digital electric box
- Electrohydraulic gearcase
- Facer/heating plate support

AUSTRALIA

TECHNICAL FEATURES

Working range	10" IPS + 24" IPS 280 + 630 mm
Power supply	230 V Three phase 50/60 Hz
Total absorbed power	12350 W
Working temperature	356° + 536° F
Outside temperature range	14° + 104° F
Time to reach welding temperature	< 20 min.
Materials	HDPE, PP, PVDF <small>For other materials contact RITMO S.P.A.</small>
DIMENSION (W x D x H)	
Machine body	45" x 40" x 40"
WEIGHT	
Machine body	914 lb
Standard composition	1560 lb

"Digital Dragon" temperature controller

ON REQUEST (ACCESSORIES)

- Clamps inserts from
Ø 10" IPS to 24" IPS
Ø 10" DIPS to 20" DISP
Ø 280 to 560 mm
- Tool for flange necks
- Special transport wooden case or metal cage (DELTA 630 only)
- Special transport wooden case or metal cage (gearcase/plate/facer)
- Wooden case for inserts
- Machine body trolley
- Electrical crane
- THE INSPECTOR data-logging
- Rollers

Fast removing system

BRAZIL

ROLLERS

ROLLERS 355

This device is essential for supporting the pipes while they are being welded with the butt fusion machines. The roller minimizes pipe friction and drag force independently of the jobsite conditions.

- **ROLLER 355** can sustain pipes up to Ø 14" IPS (355 mm). Easy to use and light
- **ROLLER 1000** can sustain pipes from up to 36" DIPS (1000 mm). The structure is light, so it is easy to carry and can be disassembled and reassembled in a few steps. This feature allows to store up to eight rollers in a single pallet thus improving transportation and logistics. Another advantage is the misalignment of the rollers in order to move the pipe easily even with the presence of weld beads. Working range from Ø 10" DIPS to 36" DIPS (315 to 1000 mm).

STANDARD EQUIPMENT

- Complete roller with tools

TECHNICAL FEATURES

ROLLERS 355
Working range up to 14" IPS 0÷355 mm
Dimensions 14,2" x 7,8" x 7,8"
Weight 29 lb

ROLLERS 1000
Working range 10" ÷ 36" DIPS 315÷1000 mm
Dimensions 41" x 23,6" x 12,6"
Weight 59,5 lb

ROLLERS 1000

INTERNAL DEBEADER

watch the video

Internal Debeader by RITMO S.p.A. covering a range from Ø 3" IPS* (90 mm) up to 18" IPS* (500 mm).
A complete kit set is composed by:

- 6 pcs of alloy rods 2,15 mtr each (one is acting as turn handle)
- 5 pcs of center rings to ensure that the rods are in center of the pipe.
- Alloy rods are delivered in a special carrying bag with a handle
- **Internal Debeader Head 90 - 110**
INCH nominal 3,54"- 4,33"; 3" IPS; 90 ÷ 110 mm
- **Internal Debeader Head 125 - 160**
INCH nominal 4,92"- 6,29"; 4" - 5" IPS; 125 ÷ 160 mm
- **Internal Debeader Head 160 - 200**
INCH nominal 6,29"- 7,87"; 5" - 6" IPS; 160 ÷ 200 mm
- **Internal Debeader Head 225 - 315**
INCH nominal 8,85"- 12,40"; 8" - 10" IPS; 225 ÷ 315 mm
- **Internal Debeader Head 355 - 500**
INCH nominal 13,97"- 19,68"; 12" - 14" - 16" - 18" IPS; 355 ÷ 500 mm

Internal Debeader Heand can be ordered separately too.

ADVANTAGES:

Intuitive and easy to use, accurate, versatile, composed of few parts.

TECHNICAL FEATURES

Model	SDR range
Ø 90 mm	17 ÷ 26
Ø 110 ÷ 450 mm	11 ÷ 26
Ø 500 mm	17 ÷ 26

DOWNLOAD

SET & GO!

APP developed by RITMO for its butt fusion machines.

“SET & GO” calculates the welding parameters in a simple, fast and useful way.

Through easy steps, like selecting the machine model, setting up the pipe data and choosing the welding standard, “SET & GO” tells you immediately your welding parameters!

The welding cycle is assisted and guided, step-by-step, by a handy timer with countdown function

“SET & GO” ...set to the future!
